

3.45–3.55 GHz band no later than December 31, 2021. To begin the process of implementing this Congressional mandate, on March 17, 2021, the Commission adopted the *3.45 GHz Second Report and Order* (FCC 21–32), in which it established a new 3.45 GHz service and adopted rules to make licenses in the 3.45–3.55 GHz band available for flexible use wireless services throughout the contiguous United States. The Commission contemporaneously adopted the *Auction 110 Comment Public Notice* (FCC 21–33) in which it announced that an auction for licenses in the 3.45–3.55 GHz band will begin in early October 2021 and requested comment on proposed procedures for the auction. Among other things, the *Auction 110 Comment Public Notice* proposed that, in addition to making the certifications already required by the Commission's rules in its FCC Form 175 auction application, each Auction 110 applicant also certify that it has read the public notice adopting procedures for the auction and that it has familiarized itself both with the auction procedures and with the requirements for obtaining a license and operating facilities in the 3.45–3.55 GHz band. On May 19, 2021, the Commission's Office of Economics and Analytics and Wireless Telecommunications Bureau released a Public Notice (DA 21–567) adopting the proposed additional certification requirement for applicants seeking to participate in Auction 110. Accordingly, the Commission seeks OMB approval for a revision to its currently approved information collection to include this additional certification on FCC Form 175. The revised collection will enable the Commission to confirm that an auction applicant has read the public notice adopting procedures for the auction and has familiarized itself both with the auction procedures and with the requirements for obtaining a license and operating facilities in the 3.45–3.55 GHz band through the applicant's certification to that effect.

The Commission's auction rules and related requirements are designed to ensure that the competitive bidding process is limited to serious qualified applicants, deter possible abuse of the bidding and licensing processes, and enhance the use of competitive bidding to assign Commission licenses and permits in furtherance of the public interest. The information collected on FCC Form 175 is used by the Commission to determine if an applicant is legally, technically, and financially qualified to participate in an auction for Commission licenses or

permits. Additionally, if an applicant applies for status as a particular type of auction participant pursuant to Commission rules, the Commission uses information collected on FCC Form 175 to determine whether the applicant is eligible for the status requested. Commission staff reviews the information collected on FCC Form 175 for a particular auction as part of the pre-auction process, prior to the auction being held. Staff determines whether each applicant satisfies the Commission's requirements to participate in the auction and, if an applicant claims status as a particular type of auction participant, whether that applicant is eligible for the status claimed. The Commission plans to continue to use the Form 175 for its upcoming auctions for Commission licenses and permits, including the forward auction component of any incentive auction, collecting only the information necessary for each particular auction.

Information Collection Being Reviewed by the Federal Communications Commission

AGENCY: Federal Communications Commission.

ACTION: Notice and request for comments.

SUMMARY: As part of its continuing effort to reduce paperwork burdens, and as required by the Paperwork Reduction Act of 1995 (PRA), the Federal Communications Commission (FCC or Commission) invites the general public and other Federal agencies to take this opportunity to comment on the following information collection(s). Comments are requested concerning: Whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; the accuracy of the Commission's burden estimate; ways to enhance the quality, utility, and clarity of the information collected; ways to minimize the burden of the collection of information on the respondents, including the use of automated

collection techniques or other forms of information technology; and ways to further reduce the information collection burden on small business concerns with fewer than 25 employees. The FCC may not conduct or sponsor a collection of information unless it displays a currently valid Office of Management and Budget (OMB) control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the PRA that does not display a valid OMB control number.

DATES: Written comments should be submitted on or before July 26, 2021. If you anticipate that you will be submitting comments but find it difficult to do so within the period of time allowed by this notice, you should advise the contacts below as soon as possible.

ADDRESSES: Direct all PRA comments to Cathy Williams, FCC, via email to PRA@fcc.gov and to Cathy.Williams@fcc.gov.

FOR FURTHER INFORMATION CONTACT: For additional information about the information collection, contact Cathy Williams at (202) 418–2918.

SUPPLEMENTARY INFORMATION:

OMB Control No.: 3060–0999.

Title: Hearing Aid Compatibility Status Report and Section 20.19, Hearing Aid-Compatible Mobile Handsets (Hearing Aid Compatibility Act).

Form Numbers: FCC Form 655 and FCC Form 855.

Type of Review: Revision of a currently approved collection.

Respondents: Business or other for-profit entities.

Number of Respondents: 934 respondents; 934 responses.

Estimated Time per Response: 13.9710921 hours per response (average).

Frequency of Response: On occasion and annual reporting requirements, recordkeeping requirements, and third-party disclosure requirements.

Obligation to Respond: Required to obtain or retain benefits. Statutory authority for this information collection is contained in 47 U.S.C. 151, 154(i), 157, 160, 201, 202, 214, 301, 303, 308, 309(j), 310 and 610 of the Communications Act of 1934, as amended.

Total Annual Burden: 13,049 hours.

Total Annual Cost: No cost.

Privacy Impact Assessment: No impact(s).

Nature and Extent of Confidentiality: Information requested in the reports and certifications may include confidential information. However, covered entities are allowed to request that such

materials submitted to the Commission be withheld from public inspection.

Needs and Uses: The Commission will submit the revised information collection to OMB to obtain a full three-year clearance. The changes being made to the information collect concern the Commission's wireless hearing aid compatibility rules as they relate to the obligations of wireless handset manufacturers and wireless service providers to: (1) Label and disclose certain information related to handset packaging; (2) post certain information on their publicly accessible websites; and (3) file annual status reports and certifications. No changes are being made to the information collection as related to standards development and the approved number of estimated respondents and responses.

The revisions to the information collection are necessitated by a Report and Order in WT Docket No. 20–3, FCC 21–28, adopted on February 16, 2021. In this Report and Order, the Commission adopted a new technical standard for determining hearing aid compatibility between hearing aids and wireless handsets and made other corresponding and implementation changes. In addition, the Commission revised the information that handset manufacturers and service providers must include on hearing aid-compatible wireless handset package labels and in the related package inserts or user manuals. The Commission revised the labeling rule in order to streamline the rule and remove outdated requirements. The new rule requires that the package label provide the volume control capabilities of a hearing aid-compatible handset that meets volume control requirements, and it maintains the requirement that a hearing aid-compatible handset's package label state that the handset is hearing aid-compatible. The new rule still requires hearing aid-compatible handsets to list the handset's hearing aid-compatible rating, but moves the location in which it is required to be listed from the package label to the package insert or user manual. The other requirements for package inserts and user manuals have not changed, but the requirements have been reorganized to make them easier to follow. The Commission's labeling revisions continue to allow consumers to access the information that they need to understand the hearing aid compatibility of handsets they are considering for purchase. At the same time, the labeling revisions give handset manufacturers and service providers flexibility in designing package labels and conveying supplemental information.

The Report and Order also revised website posting requirements for handset manufacturers and service providers. The revised rule requires handset manufacturers and service providers to post to their publicly accessible websites the technical standard used to determine hearing aid compatibility in addition to the information that handset manufacturers and service providers are presently required to post. Since handset manufacturers and service providers are already required to include the technical standard used to determine hearing aid compatibility in package inserts or user manuals for hearing aid-compatible handsets, this change will not substantially impact the existing paperwork burden estimates that OMB has already approved for this information collection. Further, the website posting requirement has been revised to eliminate the requirement that service providers post to their publicly accessible websites the different levels of functionality of the hearing aid-compatible handsets that they offer to the public. This change offsets any burden added by the requirement that service providers post the technical standard used to determine hearing aid compatibility.

Finally, the Report and Order addressed the status reporting and certification requirements for handset manufacturers and service providers. The Report and Order revised the dates that service providers must file their FCC Form 855 certifications and handset manufacturers must file their FCC Form 655 status reports. The forms were due January 15 and July 15 each year, respectively, and now are due by January 31 and July 31. These changes were made to accommodate Federal holidays at the start of January and July and to make sure the forms contain information for the full preceding 12-month periods. The Commission uses these forms as the principal way to ensure compliance with its wireless hearing aid compatibility requirements. The Commission is also revising the forms to reflect the Commission's current hearing aid compatibility *de minimis* provisions and to reflect the Commission's new mailing address.

The changes the Commission is making will not affect the number of respondents or responses, burden hours, or costs presently approved by OMB for this information collection. The Commission requests that OMB approve the proposed revisions to the currently approved information collection in order to implement the changes the Commission adopted in the Report and Order. These changes benefit handset

manufacturers and service providers by reducing regulatory burden while continuing to ensure that the Commission can fulfill its statutory obligation to monitor compliance with its hearing aid compatibility rules and make more complete and accessible information available to consumers. All other paperwork burden requirements previously approved by OMB for this information collection remain unchanged.

Meeting of the Ending 9–1–1 Fee Diversion Now Strike Force; Correction

AGENCY: Federal Communications Commission.

ACTION: Notice; correction.

SUMMARY: The Federal Communications Commission (Commission) published a document in the **Federal Register** of May 20, 2021. The document announced the first meeting of the “Ending 9–1–1 Fee Diversion Now Strike Force” (911 Strike Force) and provided a preliminary agenda for the meeting. This document corrects the document to explain that good cause exists for giving fewer than 15 calendar days' notice for that meeting.

DATES: May 25, 2021.

ADDRESSES: Federal Communications Commission, 45 L Street NE, Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: John A. Evanoff, Designated Federal Officer, Federal Communications Commission, Public Safety and Homeland Security Bureau, (202) 418–0848; or Jill Coogan, Deputy Designated Federal Officer, Federal Communications Commission, Public Safety and Homeland Security Bureau, (202) 418–1499; or email: 911StrikeForce@fcc.gov.

SUPPLEMENTARY INFORMATION:

Correction

In the **Federal Register** of May 20, 2021, in FR Doc. 2021–10597, on page 27432, in the third column, correct **SUPPLEMENTARY INFORMATION** by adding the following language to read:

Good cause for late notice: This Notice of public meeting is being published fewer than 15 days before the meeting date of June 3, 2021. This
